

# Health

St George's values the physical and emotional well being of all children in school.

We promote a healthy lifestyle and our school Values to support emotional health and well being.

We have a medication policy in school which allows essential medicines to be administered by staff in school.

Children who require Care Plans have them reviewed regularly with appropriate medical staff.

Staff who teach children who have additional health needs are trained by appropriate medical staff on their needs and how to manage their care.

In case of a medical emergency, parents will be contacted along with the appropriate medical services.
